

**Building CIP &
Societal Resilience**
presentation at 2nd ERNCIP
Conference

Professor Bengt Sundelius
Swedish Civil Contingencies
Agency (MSB)

Brussels, April 16, 2015

Key tasks for CIP & societal resilience

- Beyond Information & Intelligence Sharing
- Foster **Shared Sense Making**
- A shared situational awareness across jurisdictional and mental gaps
- Avoid **Failures of Imagination**

Key tasks...

- Identify **capacity deficits** regarding:
- Preparedness & Response & Recovery
- Focus on technological capacities **and** on governance issues
- Reduce unclarities **in advance** to be able to focus urgently on situational complexities & uncertainties
- Avoid **Failures of Initiative**

Key tasks ...

- **Coordination** across multiple boundaries
- Interconnected vulnerabilities cut across geographies and jurisdictions
- Cascading effects flow widely and deeply
- CIP & societal resilience require a common purpose & a common capacity
- Avoid **Failures of Coordination**

Key tasks ...

- Invest in **Meaning Making**
- Communicate about known and emerging risks and about resilience enhancing work
- Formulate Narratives
- Address Accountability
- Construct Closure
- Avoid **Failures of Legitimacy**

Training through Exercises

”Stress tests” at operational & strategic levels to build trust across stake-holders

Expose **cascading effects** across sectors & societies to help identify capacity gaps

Recognize multi-level & cross-border demands on governance

Whole of society approach in practice:

Public, private, volunteers in concert

Mobilise Critical Knowledge & Technologies for Strategic Purposes

- Research based knowledge plus experience based knowledge
- Knowledge from reliable evidence plus knowledge from leaps of foresight
- Knowledge and technologies fused and transformed into novel Practices
- Avoid **Failures of Learning**

A Way Forward Together

- Nurture trans-boundary **expert networks** across stake-holder organizations
- Strengthen **nodes** for network based knowledge production & dissemination
- Foster **holistic mind sets** through scenario based training
- Without **top level commitments**, there will be very limited effects on practices.
