

Welcome!

*ERNCIP – European Reference Network for
Critical Infrastructure and Protection*

Naouma Kourti, ERNCIP Project Manager

Purpose of the first ERNCIP Operators workshop

...to intensify the collaboration with the important "operator stakeholder group".

Goals with the first ERNCIP Operators workshop

- 1. Understand the needs of critical infrastructure operators in Europe related to implementing tested security solutions*
- 2. Investigate the possibility of setting up a standing advisory panel of critical infrastructure operators*
- 3. Disseminate the achievements of ERNCIP so far*
- 4. Support the development of a single market with more cost efficient security*

Possible ways forward

1. Greater involvement of operators in existing and future thematic groups

2. Setting up of standing advisory panel, either sectorial or cross-sectorial or both

.. this would result provide the scientific community, policy makers and manufacturers with a better understanding of the needs of operators whilst at the same time facilitate an evaluation of ERNCIP results by the operators..

Practical information

- 1. Please sign off your attendance both day 1 and day 2*
- 2. The presentations will be published on ERNCIP's web page:
<http://ipsc.jrc.ec.europa.eu/?id=688>
(the speakers are requested to contact the ERNCIP Office within this week in case they do not wish to share their slides on this site)*
